I have always had an interest in learning as much as I can inside of a job, learning more than required in all areas of where I've worked. I strive to be knowledgeable in all areas and to better understand areas that I lack in. I feel, the more I know, the better I can grow for myself and the company I work for.

LaunchCode, LC101 Programming Course — 2022

Software Skills Training, Software Training Bootcamp — 2019

PROJECT EXPERIENCE

Digital Filing Cabinet — Estate Planning App

- Worked on a personal project with a group from Launchcode designed to give experience in a group setting similar to a normal workforce project.
- Helped to plan and build the front and backend of Digital Filing Cabinet in a way that followed guidelines and recommendations from other group members.

WORK EXPERIENCE

Warehouse/Line Floater, French's McCormick, Springfield, MO, July 2021 – Present

- Warehouse Floater- I switch skills from different warehouse jobs including receiving, loading, picking, hauling, and rewarehousing.
- Line Floater- I switch between different lines that require different skills to maintain and run including knowledge of how different machines work and operate.
- To maintain maximum output of product I switched between lines to help fix and run lines during breaks/ lunches and have helped to train individuals on different lines.

Fresh Cap 2/Deli Associate, Walmart, Springfield, MO, March 2018 – July 2021

- Fresh Cap 2/Deli Associate - I switched between two different areas based on needs, helped train and worked hard to get work done in both areas.
- Temp Bakery Manager- I ordered stock for both the bakery and deli areas and would change prices on the sales floor and help receive items in store to put away in a FIFO manner in the backroom.

Manager, Dairy Queen, Springfield, MO, July 2015 – May 2018

- Temp General Manager- I trained to become an active General Manager of a Dairy Queen store and to take over my own Dairy Queen store. I handled the money, customer complaints, ordering supplies for the store and called for maintenance for machine problems, trained employees, ect.
